

SILINDER T

S102 T

SILINDER T is a parking for two bikes with total safety. It integrates case hardened security chain or steel cable with protective sleeve to set both wheels. There is a hidden and protected compartment where the seat is placed and the helmet can be stored.

The user just needs one padlock to secure all elements of the bike and the helmet.

ADVANTAGES

Security. Total protection of the bicycle.

Space. Orders the city.

Maintenance. Not required.

Universal. Fits with all models of the bikes.

FEATURES

Material. Steel.

Finishing coat. Coated with two layers (epoxy paint and polyester paint QUALICOAT – the special paint for external use). Customize colours.

Installation. The bike rack is screw-mounted to the floor (mechanical anchorage).
