

SMART-RAK

S121

SMART-RAK is a new support for parking two bicycles, on public roads and in community spaces. It incorporates the possibility of charging batteries for electric bicycles.

The bike is stable through the introduction of the pedal in the race. It incorporates two compartments with the plugs for the load and to be able to put the seat and the helmet, when attaching the bicycle the locked compartment is left and it can not be unzipped or removed from its interior.

The user must carry a padlock to block the wheels and the frame. Access to the battery charge may be free or managed with a currency, card or mobile application.

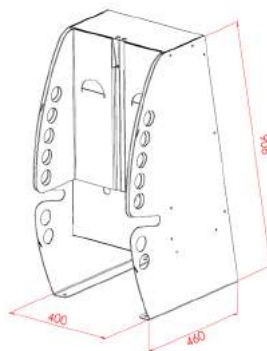

It can be supplied without plugs S121 B

ADVANTAGES:

- Safety:** The bicycle stays stable and allows it to tie it by the wheels and frame.
- Space:** Sort the city in the least space.
- Maintenance:** Not required.
- Universal:** Adapts to all bicycle models.

CHARACTERISTICS:

- Material:** Steel
- Finished:** Painted with two layers (epoxy primer and QUALICOAT polyester paint - special for exteriors). Customizable colours.
- Installation:** The support is grounded (mechanical anchorage).
