

TWO LEVELS

S087

Two tier bicycle parking system that doubles the storage capacity. The top layer bike racks are equipped with a gas damper, to lower the effort. The bicycle remains stable. Perfect to be used in the areas of high density like bus or train stations, commercial centers, schools, offices etc

There is an option of incorporating automatic locking system. The locking system can be operated by a coin, a key or a programmable card. Manual locking system just needs one padlock to secure the bike.

ADVANTAGES:

Space. Doubles storage capacity. Lower handling space needed than in other existing models. It uses tilt able rail instead of removable one.

Modular. Allows constructing unlimited parking places.

Security. Rails placed in a zigzag manner to prevent head injuries.

Universal. Fits with all models of bikes.

FEATURES

- Material. Steel.
- Finishing coat. Coated with two layers (1st epoxy paint and 2nd polyester paint QUALICOAT – special paint for outdoor use). Colour customizable.
- Installation. Support screw-mounted to the floor (mechanical anchorage).
